Product Manager | IT Project Management | System Analyst | API & Digital Payments Expert
| Fintech Strategy | AI/ML in BFSI |

SUMMARY

- 4.5+ years of Payment Industry experience within a bank setting (BFSI), specializing in Digital Banking, API Banking, and Core Banking systems. Deep domain knowledge in financial services offering, including Finance, Risk, and Compliance.
- Proven expertise in managing end-to-end digital payment ecosystem journeys, including credit card platforms, fraud prevention, and driving Go-to-Market (GTM) strategies.
- Currently leading the development of a Generative AI-powered Conversational Agent, applying innovative use-cases across Lending and Collections to enhance customer interactions.

CORE COMPETENCIES

API Banking & Payments

- Credit Card APIs, API Banking Integrations
- Vision PLUS APIs (VMX modules – Credit Card Core System)
- Digital Payments: UPI, BBPS, Payment Gateway (PG) Integrations
- Exposure to Card Processing, Payments Hub, Clearing & Settlement, Automated Clearing Programs

Program, Project & Stakeholder Management

- Program & Project Management
- Team, Stakeholder & Vendor Management
- PCI DSS, Compliance, Risk, ISG, and Data Governance

Business & Solution Architecture

- System Integration & Workflow / Process / Gap Analysis
- Solution Design, Business Architecture
- BRD, FSD, TSD, Concept Notes Creation
- Test Case & Scenario Development

GenAI & Automation

- GenAI Calling Bots, Guardrails, Language Models
- Machine Learning (Supervised, Unsupervised, Ensemble Methods)

Tools & Technologies

- JIRA & Confluence
- Postman, SOAP UI (JSON/XML/SOAP/Fixed Length APIs)
- Python (Pandas, NumPy, Matplotlib, Flask)
- SDLC (Waterfall, Agile/Scrum)
- Database: MySQL, Snowflake
- Version Control: GitHub, DAGs
- ETL Processes

Domain Expertise

- Deep knowledge of Financial Services: Finance, Risk, Compliance
- Strong understanding of Core Banking Systems and Digital Payment Ecosystems.

EXPERIENCE

HDFC Bank | System Analyst | July 2022 – Present

* Fraud Prevention ML (Machine Learning)

- Led risk prevention efforts for a new banking Machine Learning project, demonstrating **deep knowledge in Financial Services offering, including Risk and Compliance**.
- Proof-of-Concepts (POCs) on diverse datasets to validate machine learning models for fraud prevention and contributed to **SDLC via rigorous code reviews and test case creation**.
- **Enhanced the Proactive Risk Manager (PRM) system** by adding crucial data points using SQL, ensuring accuracy and efficiency through both functional and technical testing.

* API Banking

- **Led Core Credit Card Platform & API Banking:** Managed the core credit card banking platform and API banking initiatives, driving end-to-end digital journey creation through API reuse and orchestration; demonstrating **Payment Industry Experience**.
- **Delivered Strategic Projects Across Channels:** Ensured timely and strategic implementation of credit card-related business requirements across project scales (large, medium, and small), applying **Sound Knowledge in SDLC** and various methodologies (waterfall, iterative, Scrum, Agile).
- **Designed Omnichannel Credit Card Journeys:** Designed and implemented omnichannel credit card journeys across platforms (Net Banking, Mobile Banking, WhatsApp, etc.) required understanding of **Solution Architecture** and overall **Digital Payment Ecosystem**.
- **Domain Expertise in Cards & Payments:** Brought deep knowledge of cards and payment systems; managed critical systems like DCMS and X-sell, and possess **detailed understanding of India Stack** digital payment products (e.g., **BBPS**) and the **overall card processing mechanism**.
- **Technical Testing & Vision Plus Support:** Provided ongoing technical support and production maintenance for Vision Plus modules and digital systems; contributed to tokenization projects and **cybersecurity compliance**, demonstrating knowledge of Digital Payments security and compliance. **Technical API includes OBP, APIGEE, MuleSoft and etc.**
- **Stakeholder, Partner & Security Collaboration:** Engaged with stakeholders, API partners, and card networks (Visa, MasterCard,

- Rupay, Diners); contributed to tokenization projects and cybersecurity compliance in partnership with the Data Governance team.
- Designed and implemented multiple customer journeys for the **Loan on Credit Card** product across various banking platforms, proving experience in the **Payments Domain**.

* Credit Card Generative AI Calling Bot (Generative AI)

- Evaluating and optimizing various Generative AI models to identify the best fit for specific banking use cases, applying innovative use-cases across Bank business lines.
- Leveraging the bank's multi-modal, enterprise-based Generative AI system for advanced solution development.
- Crafting effective prompts for AI-driven calling scripts to facilitate seamless and productive customer interactions.
- Orchestrating the integration of the Generative AI solution with multiple core banking systems to ensure comprehensive functionality, demonstrating hands-on experience in support and implementation.
- Integration of Dialer to the Generative AI platform for dialing customers via Calling BOT.

HighRadius | Data Analyst Trainee | August 2021 to July 2022

- Developed and delivered real-time, interactive dashboards using Tableau, providing crucial insights for Go-To-Market (GTM) business decision-making.
- Streamlined data pipelines by fetching data from Salesforce via ETL, transforming and building analytical tables Snowflake.
- Conducted Proof-of-Concepts (POCs) for machine learning models focused on predicting project costs and estimations, offering predictive insights valuable for GTM planning.
- Independently led data analysis projects from development through implementation, collaborating with global teams to drive process and system improvements directly impacting GTM operations.

Wipro | Turbo Trainee | March 2022 - July 2022 (overlap with HighRadius)

- Developed a web-based application(ATM simulator) for B2B transaction payments, utilizing HTML, CSS, JavaScript, and SQL.
- Designed and implemented a Java-based movie ticket booking system, showcasing object-oriented programming skills.

ACCOMPLISHMENTS

- Generative AI Conversational Agent Development:** Engineered a prompt-based conversational AI bot to automate customer interactions for critical use cases, including Lending (Loans on Credit Cards) and Credit Collections (Credit Card Payment Collections), facilitating natural language dialogue and process automation.
- Net Banking / Mobile Banking Modernization:** Spearheaded integration of legacy credit card services into modern digital platforms, delivering new customer-facing features and enhanced UX. Managed migrations and cutovers across multiple channels ensuring seamless adoption.
- Loan On Card:** Designed and implemented multiple customer journeys for the *Loan on Credit Card* product across various banking platforms. Developed key functionalities to enhance product performance and drive cross-sell opportunities for the bank. Handling over **5M+ hits**, **3M+ unique visitors**, and **₹400B+ monthly disbursements**.
- Credit Card Domain Expertise:** Gained in-depth understanding of key credit card functionalities by analyzing, utilizing, and integrating them into various frontend applications. Applied this domain knowledge to enhance user experiences and drive improvements across multiple banking platforms. Delivered enhancement projects driving **₹120+ Cr/month** in incremental top-line revenue and expanded product reach across new platforms contributing a additional **₹250+ Cr/month**.
- Machine Learning Based Rules:** Conducted comprehensive testing and validation of fraud risk management (FRM) rules powered by machine learning to detect suspicious credit card transactions. Contributed to improving the accuracy and effectiveness of fraud identification across banking systems.
- Industry-first Innovation:** Launched **Smart EMI on WhatsApp**, India's first end-to-end financial transaction over chat, increasing customer engagement and satisfaction while setting a benchmark for conversational banking.
- Project Leadership & Delivery:** Actively led end-to-end project delivery as part of my core responsibilities, overseeing planning, coordination, and execution across multiple initiatives. Developed strong project management capabilities, including stakeholder communication, timeline management, and cross-functional collaboration. This experience significantly enhanced my contribution to other projects, enabling smoother execution and improved outcomes.

AWARDS

- Successfully propelled the **Loan on Card Business** to new heights through the implementation of several innovative modules.
- Recognized with an award for leading the seamless integration of credit cards into the new Mobile Banking and Net Banking Rewrite.
- Awarded for Go-Live of BBPS(Bharat Bill Payment System) for **HDFC Bank Credit Card** in impressive timeframe of 9 days.
- Recipient of the prestigious **Gold Star Award** on two separate occasions, acknowledging consistent exceptional performance.
